2021-06-01 A New York Times bestseller
 • Nominated for the National Book Award for Fiction • Ocean Vuong's debut novel is a shattering portrait of a family, a first love, and the redemptive power of storytelling

New York Times Readers Pick: 100 Best Books of the 21st Century • A Kirkus Reviews Best Fiction Book of the Century “A lyrical work of self-discovery that’s shockingly intimate and insistently universal...Not so much briefly gorgeous as permanently stunning.” —Ron Charles, The Washington Post “This is one of the best novels I’ve ever read...Ocean Vuong is a master. This book a masterpiece.”—Tommy Orange, author of *There There* and *Wandering Stars* On *Earth We’re Briefly Gorgeous* is a letter from a son to a mother who cannot read. Written when the speaker, Little Dog, is in his late twenties, the letter unearths a family’s history that began before he was born — a history whose epicenter is rooted in Vietnam — and serves as a doorway into parts of his life his mother has never known, all of it leading to an unforgettable revelation. At once a witness to the fraught yet undeniable love between a single mother and her son, it is also a brutally honest exploration of race, class, and masculinity. Asking questions central to our American moment, immersed as we are in addiction, violence, and trauma, but undergirded by compassion and tenderness, *On Earth We’re Briefly Gorgeous* is as much about the power of telling one’s own story as it is about the obliterating silence of not being heard. With stunning urgency and grace, Ocean Vuong writes of people caught between disparate worlds, and asks how we heal and rescue one another without forsaking who we are. 2020-06-14 Social isolation and

loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. Social Isolation and Loneliness in Older Adults summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes recommendations specifically for clinical settings of health care to identify those who

suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. Social Isolation and Loneliness in Older Adults considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish. 2021-06-30 High-quality primary care is the foundation of the health care system. It provides continuous, person-centered, relationship-based care that considers the needs and preferences of individuals, families, and communities. Without access to high-quality primary care, minor health problems can spiral into chronic disease, chronic disease management becomes difficult and uncoordinated, visits to emergency departments increase, preventive care lags, and health care spending soars to unsustainable levels. Unequal access to primary care remains a concern, and the COVID-19 pandemic amplified pervasive economic, mental health, and social health disparities that ubiquitous, high-quality primary care might have reduced. Primary care is the only health care component where an increased supply is associated with better population health and more equitable outcomes. For this reason, primary care is a common good, which makes the strength and quality of the country's primary care services a public concern. This is the story of Irish theatre legend, Katherine O'Dell, as written by her daughter Norah. It tells of early stardom in Hollywood, of highs and lows on the stages of Dublin and London's West End. Katherine's life is a grand performance, with young Norah watching from the wings. But this romance between mother and daughter cannot

survive Katherine's past, or the world's damage. As Norah uncovers her mother's secrets, she acquires a few of her own. Then, fame turns to infamy when Katherine decides to commit a bizarre crime. *Actress* is about a daughter's search for the truth: the dark secret in the bright star, and what drove Katherine finally mad. Brilliantly capturing the glamour of post-war America and the shabbiness of 1970s Dublin, *Actress* is an intensely moving, disturbing novel about mothers and daughters and the men in their lives. A scintillating examination of the corrosive nature of celebrity, it is also a sad and triumphant tale of freedom from bad love, and from the avid gaze of the crowd.
