2004 Arthur Beetson was the biggest and best player - and personality - of a football era that most rugby league fans over the age of 35 remember fondly, vividly, with great passion. The son of a member of the Stolen Generation, Arthur was a great forward, who won Tests and Grand Finals, but who was often sent off in crucial games, was once dropped while Australian captain and was even linked to the mysterious death of a team mate in a pub brawl. A popular image

was of Beetson with meat pie in hand and his coaches sometimes questioned his work ethic. But as the game became a major television sport he evolved into the face of league. Arthur was the first Aborigine to captain his country in a major sport. Artie remained Australian skipper until 1977, and in 1980, in a famous farewell, inspired Queensland to victory in the inaugural State of Origin match. His legendary clash with Eels colleague Mick Cronin, which emphatically refuted suggestions that clubmates might go easy on each other, is still arguably the most significant of all Origin incidents. Today he is an Australian selector, a father figure at Easts, and a larrikin raconteur with a million yarns. He has witnessed close up all the big stories in rugby league - and many of the funniest - for 37 seasons (and been the pivotal figure in many of them), from an Ashes victory back in 1966 through to the Roosters wins of today. He has come into close contact with many of the game's most important figures, including Jack Gibson, Wayne Bennett, Wally Lewis, Mal Meninga, Peter Sterling, Bob Fulton, Ricky Stuart, Alfie Langer, Brad Fittler - the list, like the honour roll of Big Artie's achievements, goes on and on. Big Artie is Beetsons candid autobiography told in Beetsons typical bootsn all manner as you would expect from a man who played 372 matches of senior rugby league most of them at the highest fiercest level

2004-03-18 This is the first-ever critical history of sociology in Britain, written by one of the world's leading scholars in the field. Renowned British sociologist, A. H. Halsey, presents a vivid and authoritative picture of the neglect, expansion, fragmentation, and explosion of the discipline during the past century. He is well equipped to write the story, having lived through most of it and having taught and researched in Britain, the USA, and Europe. The story begins with L.T. Hobhouse's election to the first chair in sociology in London in 1907, but traces earlier origins of the discipline to Scotland and the English provinces. There is a lively account of the nineteenth-century battles between literature and science for the possession of the third culture of social studies, setting the context for a narrative history of rapid expansion in the second half of the twentieth century. LSE had a virtual monopoly before World War II. The educational establishment of Oxford and Cambridge opposed its introduction into the undergraduate curriculum. Only the expansion of sociology to the Scottish, Welsh, provincial, and 'new' universities after the Robbins Report of 1963 brought reluctant acceptance of the subject to Oxford and

Cambridge. The student troubles of 1968 are then described and the subsequent doubts, confrontations, and cuts of the 1970s and 80s. Then, paradoxically by a Conservative Government, there was a new university expansion incorporating polytechnics and other colleges, with a consequent doubling of both staff and students in the 1990s. Yet the end of the century left sociology riven by intellectual conflict. It had survived the Marxist subversions of the 70s and the feminist invasion. Yet the renewed challenges of various forms of relativism (especially ethno-methodology and post-modernism) still threatened, and at root the war was, as it began, between a scientific quantifying and explanatory subject and a literary, interpretative set of cultural studies. This is the first ever critical history of sociology in Britain written by one of the worlds leading scholars in the field
